

# FinKey

The key to security  
in your hand

## FinLock Series

- New biometrics-based safety for your gun cabinet
- Enhanced protection with dual security components: fingerprint and conventional lock
- Simple, convenient operation
- Opening only after the fingerprint has been positively identified
- System available with key lock **FinKey** or electronic lock **FinPin**
- Suitable for retrofitting

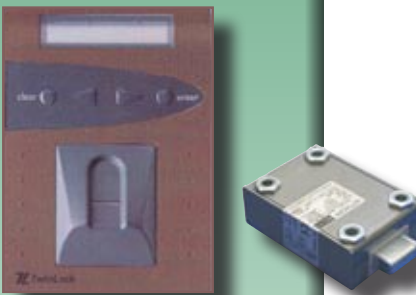

## FinLock Series

- Initial set-up: Three “master fingerprints” are read in using the fingerprint scanning device. These “master fingerprints” allow a maximum of ten user fingerprints.
- The lock is opened only if the scanned biometric features correspond to the stored data. Minor injuries to the fingertip will not affect fingerprint capture.
- A line raster detector incorporated into the scanner prevents misuse of copies of fingerprints lifted from a surface.

## FinKey

- Fingerprint scanner combined with mechanical lock
- Certified to VdS class 1/EN 1300 A
- Square bolt
- Standard dimensions
- 8 levers

## FinPin

- Fingerprint scanner combined with electronic lock
- Certified to VdS class 2/EN 1300 B
- Motor-driven bolt
- Standard dimensions
- Emergency power input at the keyboard
- Optional: TwinLock BioPin, certified to VdS class 3/EN 1300 C (for biometric protection at higher safety classes in all types of applications)

(Subject to technical modification without prior notice)
